

Template Design Sync: Multiple Project Sites (PowerShell)

Please see the [Template Design Sync: Multiple Project Sites \(PowerShell\)](#) blog for detailed instructions

Step in Summary

1. Log into your SharePoint server
2. Download the Zip file and extract the PowerShell script to the SharePoint server e.g. to `c:\BrightWork\DesignSyncScripts`
3. Run the SharePoint 2010 Management Shell as Administrator
4. Set the location to the folder of the PowerShell script e.g.
`cd "c:\BrightWork\DesignSyncScripts"`
5. Enter the name of the PowerShell script preceded by `.\` and the absolute URL of the template to use:
`.\GenerateDesignSyncScriptForSpecifiedTemplate.ps1`
`http://<server>/sites/<sitecollection>/templates/template`
6. Edit the generated PowerShell (if appropriate)
7. Enter the name of the Generated PowerShell script preceded by `.\` and log file details:
`.\SyncProjectsBasedOnTemplateTemplateNameTemplate.ps1 | Out-File`
`-filePath "C:\BrightWork\DesignSyncScripts\Logfile.txt"`
8. Exit PowerShell
